

## WORLD-CLASS TRAINING FOR BUSINESS CONTINUITY AND RESILIENCE PROFESSIONALS INTRODUCTION TO ORGANISATIONAL RESILIENCE

### COURSE DESCRIPTION

This course is a comprehensive learning opportunity covering all aspects of developing and implementing an incident response structure and crisis management capability. It begins with learning how to build an incident response structure, as introduced in the Design stage of the Business Continuity Management (BCM) Lifecycle, and goes beyond incident management into learning how to build a crisis management capability in an organisation.

This course provides the business continuity and resilience professional with the opportunity to gain deeper knowledge and understanding of this subject as well as the opportunity to apply this knowledge in the classroom using a case study and an exercise.

This course reflects on the UK guidance to organisational resilience BS 65000 and the current global thinking at an international level.

### LEARNING OBJECTIVES

The objectives of this training course are to provide students with the ability to:

- ◆ Understand the principles, strategies and techniques for incident response and crisis management.
- ◆ Develop the knowledge and skills necessary for implementing an effective structure and processes for responding to, and managing, incidents and crises.

### WHO SHOULD ATTEND?

◆ Business continuity and resilience professionals who are already familiar with the concepts of enterprise risk, emergency response, business continuity, crisis management and disaster recovery management.

### PREREQUISITES

◆ It is recommended that students have a minimum of a CBCI or equivalent credential with experience working in an organization in a continuity and resilience related role.
