

FAILING TO THINK IS PLANNING TO SINK

FUNDAMENTALS OF BUSINESS CONTINUITY MANAGEMENT

COURSE FEATURES

This one-day course on Fundamentals of Business Continuity Management (BCM) will allow participants in any organisation to understand the concept and principles of Business Continuity Management and Organisational Resilience and how it can be applied in their respective organisations to ensure Continuity and Resilience at all levels.

An analysis on how changes in the global environment can impact any sector and how the Business Continuity Institute Good Practice Guidelines (BCI GPD) and ISO 22301 -Security and Resilience and Business Continuity Management systems can be used to continue the delivery of critical services and products during a disaster, crisis, pandemic, technology failure etc..

This can be achieved by

- implementing an effective Business Continuity Management System (BCMS)
- identifying, securing and continuing the Mission Critical Activities of their organisations
- aligning Business Continuity methods and techniques in implementing GRC- Good Governance, Risk Management, Compliance
- taking into account the continuity needs of any specific organisation in terms of its strategic objectives, culture, context, structure, operations, processes, functions, projects, products, services, or assets and any specific practices employed
